

Short Caps (SC Series)

Features

Vinyl Short Caps are the most economic choice for masking products during most liquid painting and plating processes.

The flexible vinyl stretches to form a tight seal over threads, beaded tubes, and odd shapes.

Vinyl short caps also possess excellent chemical resistance to withstand most washing processes.

Flexible Short Caps can be applied quickly and easily.

No matter what the application, they fit snugly without cracking or splitting.

Choose from thousands of sizes in your choice of colours.

Unique dip moulding process allows hundreds of design possibilities by varying wall thickness, hardness, inside length and surface texture.

Applications

Thread protectors, masks (for painting, plating, powder coating, shot blasting), insulators, decorators, seals, colour coding, nut covers and much more.

Inside Diameter

Because Short Caps are soft and flexible, we suggest using a vinyl caps a few sizes smaller for a tighter fit. For example, if your outside diameter is 12.70 mm, use a 11.10 mm Short Cap.

Wall Thickness

'C' is measured 6.4 mm from the open end. Wall tolerance is ± 0.25 mm.

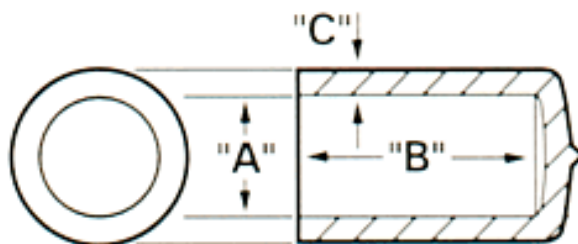

Materials

Our stock material is Black PVC with a glossy finish. Service temp. -30° to $+60^{\circ}\text{C}$. Other colours to special order with M.O.Q's and lead times. Stock Caps also available in high temp. Resistant material -18° to $+230^{\circ}\text{C}$.

A UV stabiliser can be added for caps exposed to UV, minimum order quantity would apply.

See material chart for specifications.

Refer to Page 3 for a list of our stocked range of Short Caps (SC Series).
